

Kanthalloor is a village known as the “Southern Kashmir” due to its chilling climate and misty ambience.

Nested in the western ghats of India, at 50 Kms west from Munnar and 11 Kms from Marayoor Sandalwood forest.

This is the only place in Kerala, where temperature remains below 19°C, throughout the year. We are committed to preserve and maintain the environment and natural resources at its best, for the current and future generations to enjoy.

We shoulder this responsibility at Rainforest Kanthalloor Orchard, and we let our guests enjoy nature at its best, by offering them unique lifestyle experience in our farm house.

The typical farm house offers you three bedrooms in an exclusive organic farming environment replicating the lifestyle and our rich heritage.

Rainforest Kanthalloor Orchard lies in a two acre secluded compound. The fertile land is abundant with rare fruit bearing trees, exotic varieties of vegetables, herbs, fruits and other imported fruits and flowering plants.

We assure you, this will be an unique experience. An experience we often miss in our urban lifestyle.
